# About Us

## Litetec Ltd 1985

We are a 2nd Generation family run business starting out in 1985 specialising in fibre optics. From there our team grew rapidly and we quickly became top suppliers and specialists in all things fibres and optics.

## Total Sensory 2010

The opportunity arose for us to branch into sensory. We soon became one of the UK's leading Sensory Room designers, manufacturers and installers priding ourselves in innovative ideas and products made here in the UK

## Total Sensory UK Ltd - Today

Today we are market leaders with a wealth of knowledge and experience. We have some big names in our portfolio that we have worked with such as Alton Towers, Ascot Racecourse, Chessington and Baby Sensory. We even have our very own Sensory Room in Legoland.

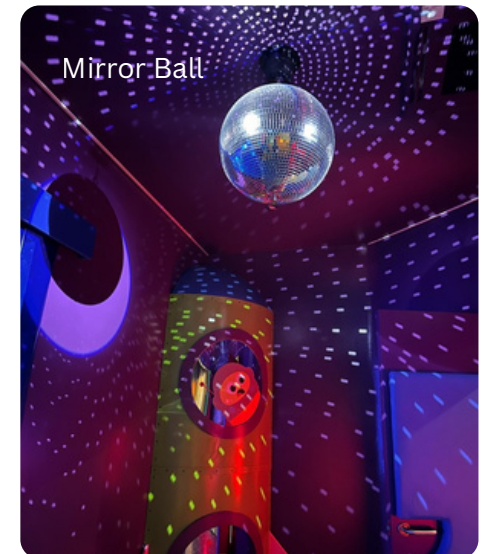

# Alton Towers Resort

## Bringing visions to life...

We worked closely with BBC Studios and Merlin Entertainment to design and create this stunning Sensory Room which is based in their CBeebies Land in the main park. In total we created 5 Sensory sections which is a multi-sensory space designed for all disabilities.

# Alton Towers Resort

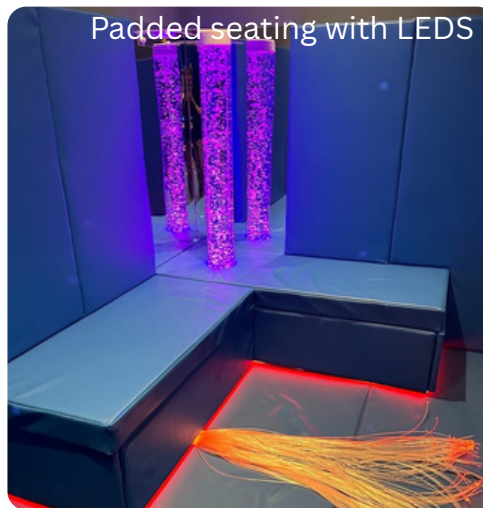

Hexagon Infinity Mirrors

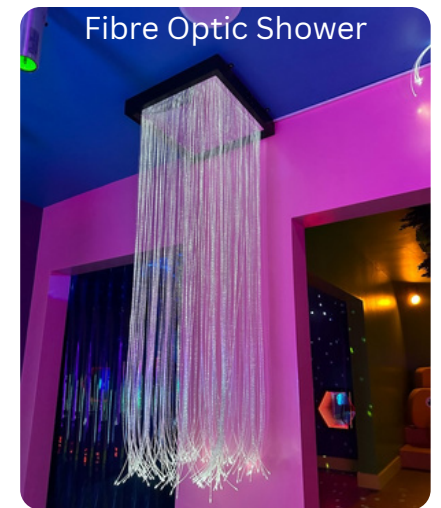

Fibre Optic Curtains

Sound to light panel

Padded seating with LEDs

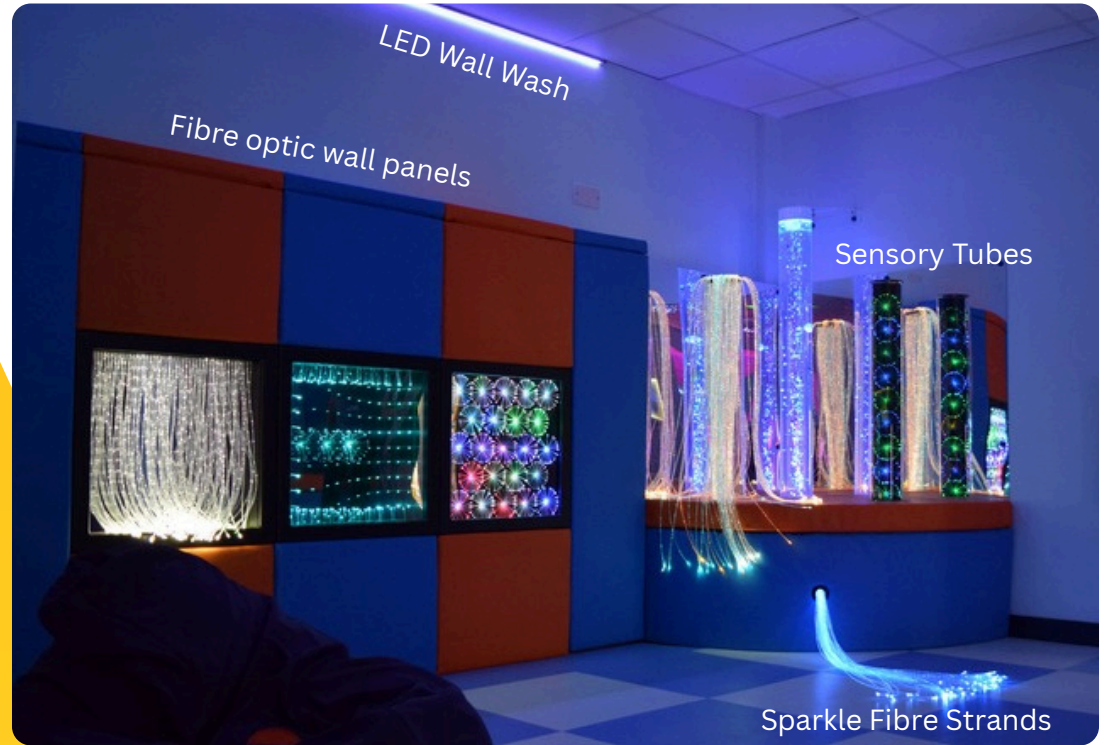

Fibre Optic Shower

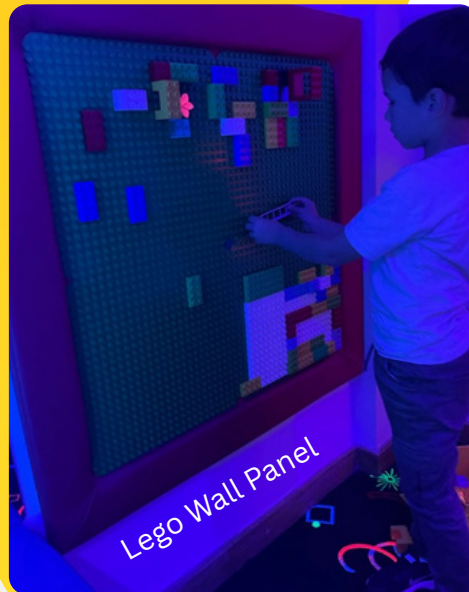

# LEGOLAND

We are very fortunate to have our own Sensory Room inside the main park and in the Legoland Hotel. This has been a huge success for Legoland. It is a safe space for users of all ages to escape a busy theme park.

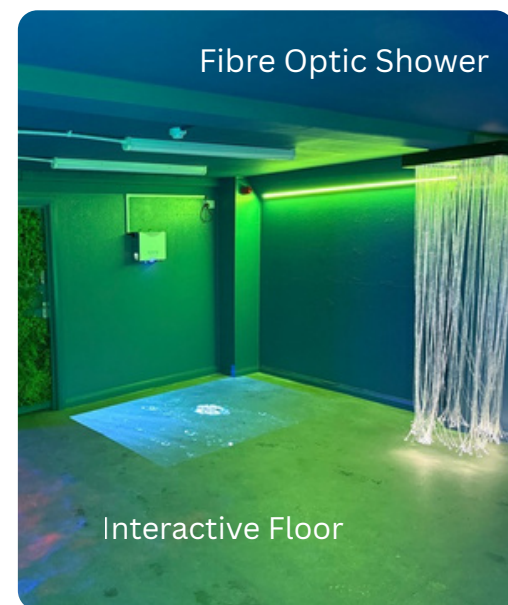

# LEGOLAND

# Chessington World of Adventures

We were given the fun task to create a unique Sensory Space based on influences of the safari park. We included jungle like features on a show stopping foliage tactile wall, complete with a fibre optic butterfly tube. An interactive floor, fibre optic shower, animal print UV tactile panel to go in the UV corner and many more fun products aimed for all users to enjoy. The room has joined Merlin's inclusive brand and the on going awareness and support for those with additional needs.

# Ascot Racecourse

We were asked by Ascot to create a Multi-Sensory space in a modular building. This space is has been a huge success among the users, especially during the busiest race periods. We have had fantastic feedback from Ascot and how well loved this space is.

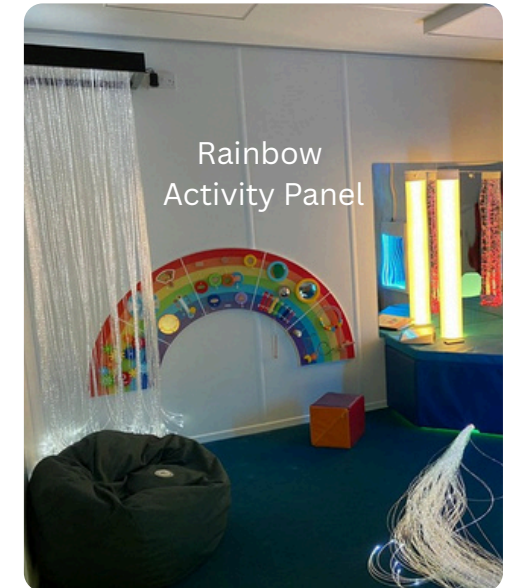

Mood Cube

Sequin Panel

Vibrating bean bag

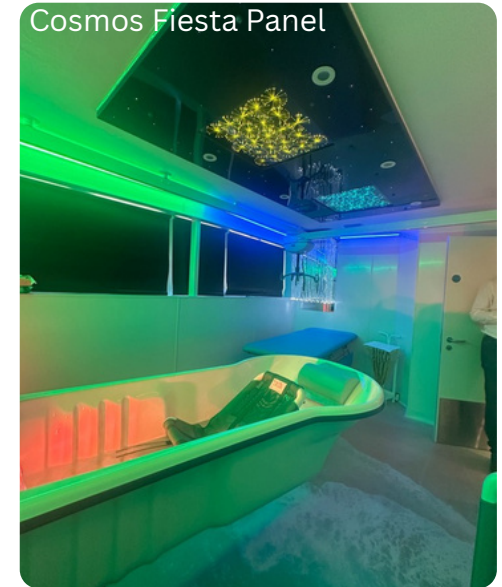

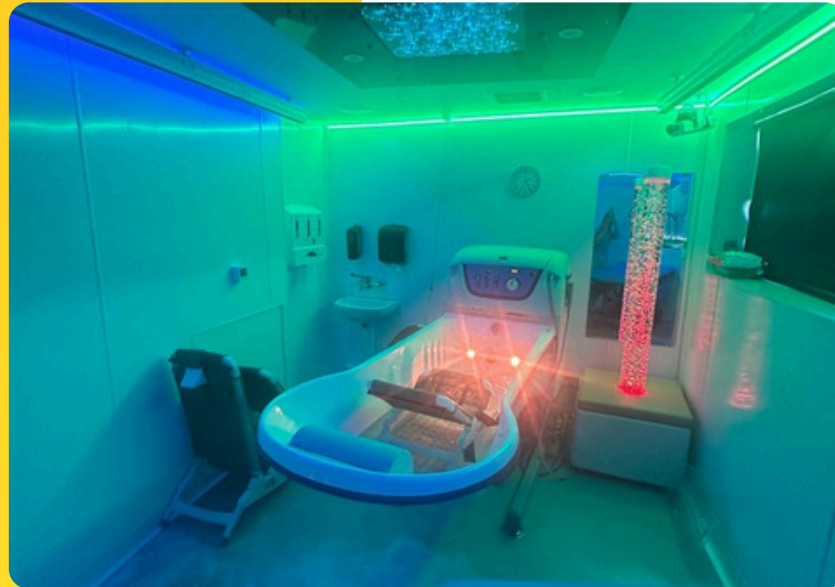

Rainbow Activity Panel

# Little Havens Hospice

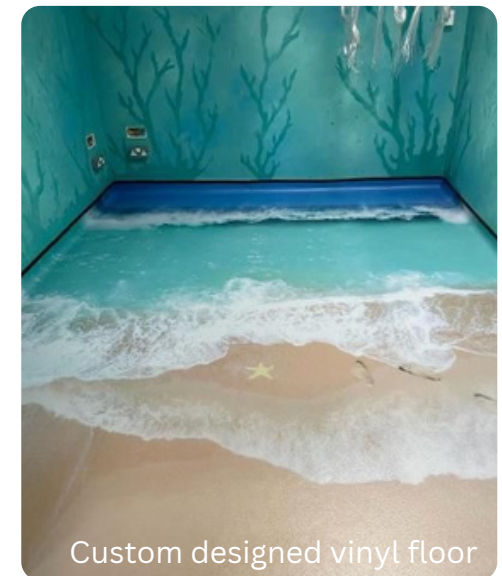

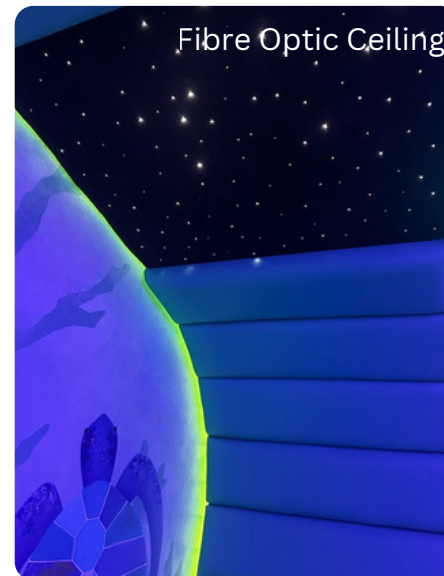

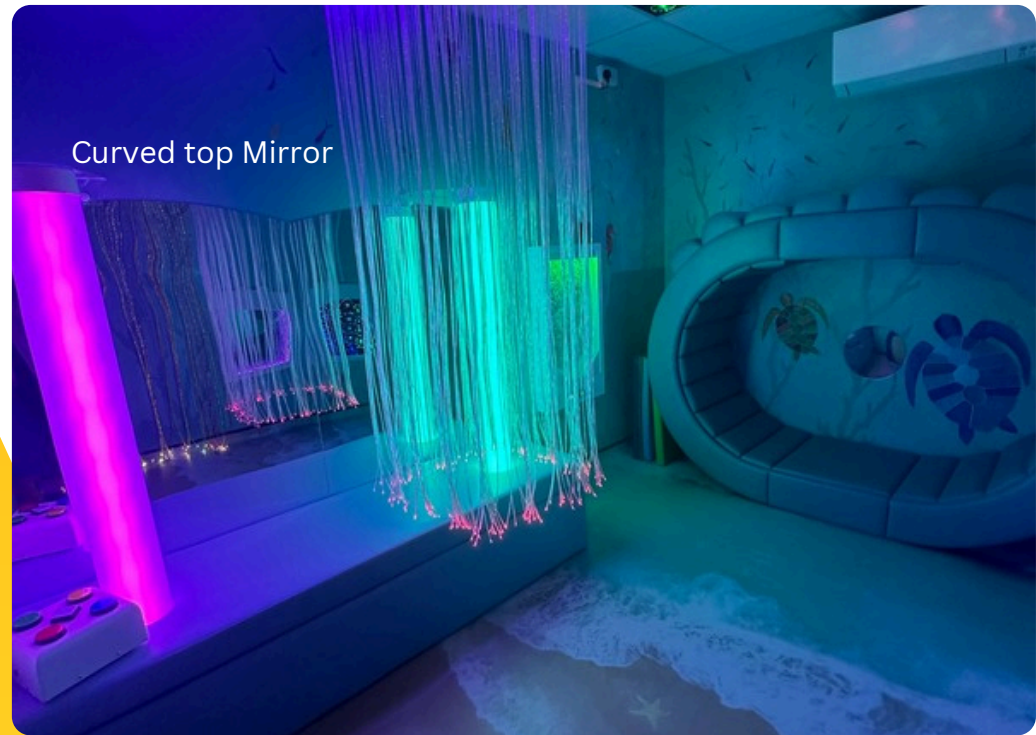

Having worked with Little Havens before we were invited back to transform the bathroom into a tranquil and relaxing space for users to truly relax and enjoy. We have had tremendous feedback and our users family have praised the new room

# Wexham Park Hospital Children's Ward

The charity team at Wexham Hospital invited us back to create a second Sensory Room for their Children's Ward. They gave us some inspiration and from there we created a visually stunning under the sea themed room. We decided on a captivating custom designed vinyl floor, along with a beautiful hand painted mural on the wall and an incredibly well crafted seating for the users to enjoy. The room has had amazing feedback.

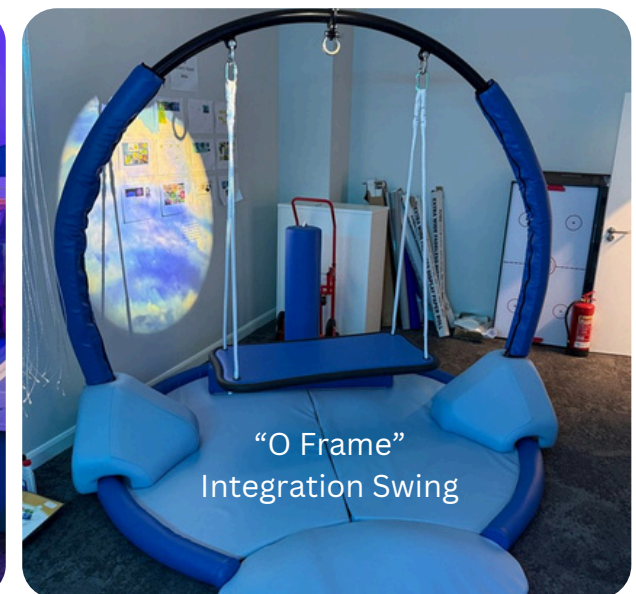

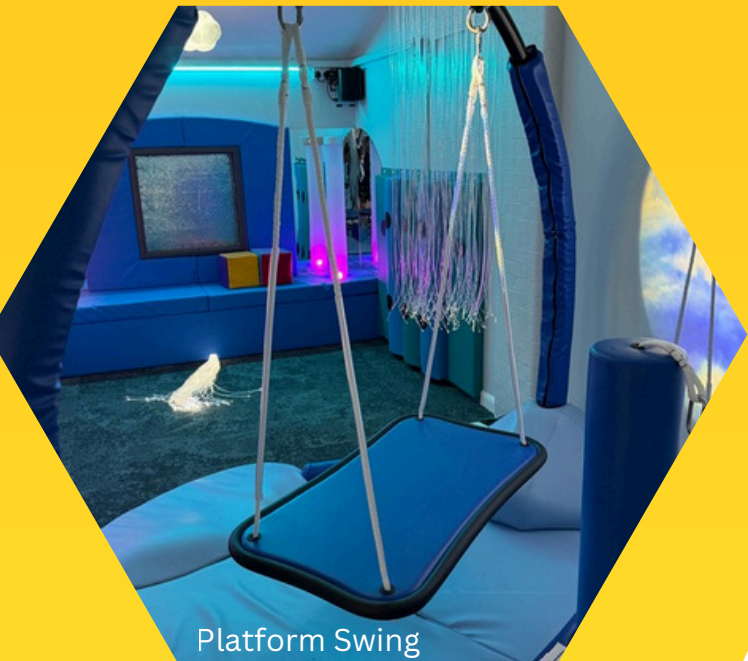

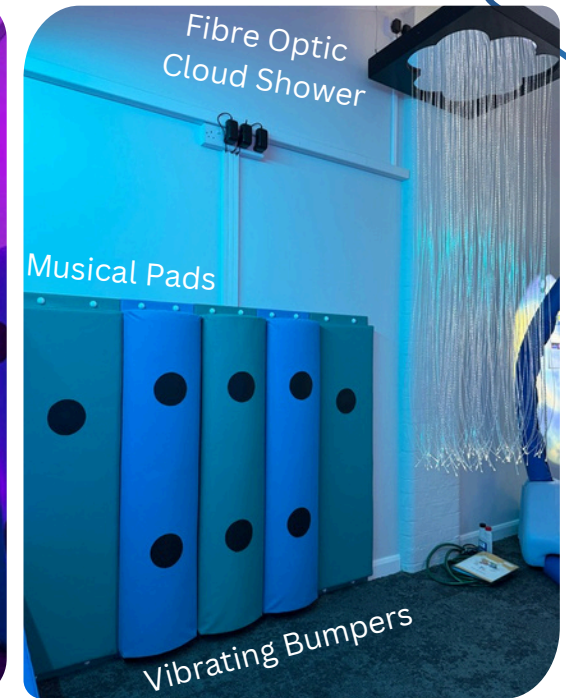

# Wexham Park Hospital Children's Ward

# Abingdon House SEN School

We had the exciting task of creating this beautiful dream like Multi-Sensory Room. We were asked to incorporate sensory items along with sensory integration.

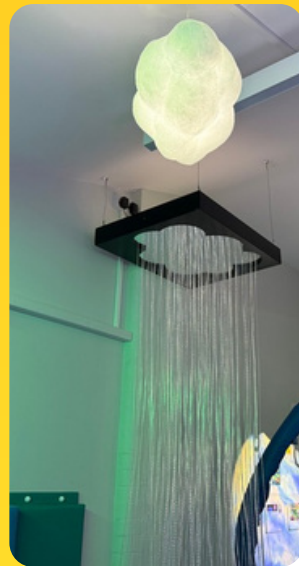

# Goodysphere

We had the pleasure of creating a sensory room on wheels for the team at Goodysphere. With it being a first for us, our very capable installers worked extremely hard to make this happen for them. This included stripping the minibus back completely and boarding out the walls to create the perfect space for us to incorporate our sensory products. They wanted a rainforest-themed space designed to make calm, comfort and connection accessible for everyone

**A McKenna (AA)**

2025.01.13

Total Sensory were professional and helpful from start to finish. They used 'quiet' drills which really helped when children were in the building. The finish was great and the children really benefit using the room in its new format. Thank you to all, from sales to fitting.

**Rachael Ross**

2024.11.22

We are really happy with our bespoke sensory room provided by Total Sensory UK Ltd, and our families love it. Not only does it provide a calm and fun safe space, it also has huge educational benefits, and plays a key part in our early development programme. Total Sensory provided excellent advice and service throughout the process. Portsmouth Down Syndrome Association

At Frimley Health Charity we had the pleasure of working with Total Sensory on a project at Wexham Park Hospital. we designed a unique room that offers a bespoke seating area, lighting, sounds and so much more. The room is used so much and so many families have to able to be there and spend time with their little ones. The skillset and quality of the work from start to finish was brilliant and so easy to work with the team. Thank you.

# So why choose Total Sensory UK Ltd?

## Leading UK Sensory Company

We have over 40 years experience manufacturing fibre optics and over 15 years creating stunning Sensory Rooms. We are one of the UKs oldest and leading Sensory Room designers and installers. Our specialist team have the experience and knowledge to create a unique Sensory experience that is perfect for your users.

## UK Manufacturers

We design and make many of our own products in our Warehouse in Doncaster and Head Office in Essex. And for the rest of our products, all of our suppliers are based here in the UK. We are proud to support local businesses and we have great relationships with our trusted UK Suppliers.

## Experience

We have worked with several big named clients such as the NHS, Baby Sensory, Ascot Racecourse, BBC Studios, Warner Brother Studios and Merlin Entertainment. We even have Sensory Rooms at Chessington, Alton Towers and Legoland. We are the only Sensory Company to have our own Sensory Rooms at a Theme Park and hotel! You can put your trust in us to provide you with a high quality Sensory Space. We cover the whole of the UK at a wide variety of budgets and room sizes.

## Innovative and Creative

We are always designing unique and custom Sensory Products. Many of which are unavailable to anyone else on the market. We also work closely with our Suppliers to help create new and exciting products.
